■ Work Experience

- **Native Infotech**
(March 2022 – Feb 2025)

WordPress & PHP Developer

Roles & Responsibilities:

- Customize WordPress themes and plugins to create tailored, fully functional websites for clients.
- Create and manage custom Gutenberg blocks using ACF
- Work with WooCommerce for eCommerce functionality.
- Implement REST API & AJAX for dynamic features.
- Collaborate with designers and clients for project success.

Work Summery:

As a WordPress Developer, I specialize in developing custom themes using ACF fields, creating custom WordPress plugins based on client requirements, and modifying WooCommerce functionality to enhance user experience. I have also built a custom ACF Gutenberg block plugin, enabling dynamic and flexible content management. With expertise in PHP, WordPress hooks, and database management, I ensure high-performance, secure, and scalable web solutions.

Technical Skills

- WordPress
- WooCommerce
- PHP

■ Recent works

• Welfare CareAlert - Zoho API & Vonage Integration

Work Summery:

- Developed a WordPress plugin to automate subscription management using Zoho API.
- Implemented customer creation, payment processing, card detail retrieval, and email-based customer data verification.
- Integrated Vonage for call and SMS functionalities to notify users of unanswered calls, emails, and SMS based on their subscription.
- Enhanced automation for subscription-based services.

• Klarned (Custom theme + Klarned Block Custom Plugin Development)

Work Summery:

- Created a custom WordPress theme with the help of the ACF fields.
- Klarned Blocks is a custom WordPress plugin that provides ACF-based Gutenberg blocks for flexible and dynamic content creation.
- The plugin registers custom ACF blocks and includes predefined ACF field JSON files, eliminating the need for manual field setup.

• Ceramitag.com

Work Summery:

- Developed a custom WooCommerce plugin for a website selling personalized frames.
- Implemented a dynamic canvas feature that adapts to the selected frame size, allowing users to write on it before purchase.
- Created custom attributes for frame size and font size to enhance product customization.
- Modified WooCommerce's default email design to improve order communication.
- Integrated WPML for seamless multilingual support.
- Enhanced the overall user experience and streamlined the customization workflow.

• Custom Slug Editor – WordPress Plugin

Work Summery:

- Developed a WordPress plugin that allows administrators to customize or remove slugs for post types and taxonomies.
- Simplified URL structures to enhance SEO and improve user experience.
- Enabled easy slug modifications directly from the WordPress admin dashboard.
- Provided a user-friendly interface for better permalink management.
